

Product Data Sheet

EasiFix Cove

Introduction

Overview

EasiFix Cove 100 and 127 is a 'C' profile gypsum plaster cove.

Application

Use it to conceal cable runs and mask settlement cracks.

Product	Length	Corners
EasiFix 100	2m	
EasiFix 127	2m	
EasiFix Pre-mitred corners 100		Internal
EasiFix Pre-mitred corners 100		Internal & External
EasiFix Pre-mitred corners 127		Internal
EasiFix Pre-mitred corners 127		Internal & External

Installation

Preparation

Ensure wall and ceiling backgrounds are sound, clean and dry, removing any wallpaper before attempting to fix the cove. For easier installation, draw guidelines along the wall and ceiling with a pencil at the appropriate distances. For Gyproc Cove 100, lines should be drawn at 67mm down the wall and 67mm across the ceiling. Scratch plastered or painted areas which will be in contact with the cove to provide a key for the adhesive and brush away any dust or loose material.

Cutting

Cut the product to the required length using a cove mitre block and a fine tooth saw.

Fixing

Apply the adhesive in a 3mm thickness to both surfaces of the cove that will be in contact with the wall. For very dry plaster backgrounds or those with high suction, dampen down with a clean sponge and clean water immediately prior to adhesive application. This will prevent the adhesive from drying out too rapidly.

When installing the cove lightly nail the line marked on the wall to provide temporary support to the profile until the adhesive has set. Use two nails for each piece. These should be removed once the adhesive is set. Offer up the profile and push it firmly into position between the guidelines.

Conditions

Standards

EN 14209:2017.

Storage

Store in a dry place and keep out of sunlight.

Recyclability

This product can be recycled.

Disposal

Segregate the product from non-gypsum waste for recycling where possible and dispose of it according to local authority requirements.
